

MOMBACCUS

6/27/76

Franklin Clark

Karl Beard (Mombak Trust)

Cottkill's Flat SS
Flags slide down upon
one other on steep slopes,
making difficult
climbing. This is unlike
the Shawangunk Condon-
evate which backs onto
cubic blocks that seldom slip

Schedule:

Freeman Road	9:00 AM
2940' Summit	11:00
3000' Summit	NOON-1 PM
Freeman Road	2:30 PM

The Mombak-Oak border is abrupt
on the NW shoulder of ridge crest.
Oak could be here repeated
barns (multi-stemmed)
and always there
(federal thodolys?)
Oak = DROUGHT

3000' Summit & South Shoulder:

R Oak dom.
RM
MO
K in flower
Ham
Polypody

Vang
AN
Potentilla
Aronia
Deschampsia

Rock dips 10° W
SS with few pebbles.
Semi-open canopy,
trees 20' tall & 6" DBH,
max.
Small bedrock opening to SW.
Oaks mostly clumped
with repro.

0-2" A. pH 4.6
2-3" poorly developed A2
3-7" golden brown B

North shoulder of crest:

BC-B-S-~~YB~~-RM-Ilex montana,
AA, MC, TB, OX, MM.
More brushy. Oak less common.
YB dominates N slope below crest.
Beech hard hit by wet snow of 5/19/76: injured leaves.

2500' N slope,
moister base of steep pitch.
ASH-SUB-EUP-ARIS-PA-OST-MO-Vrot-S (some)
SUB dom - scat R OAK. Max DBH all spp 16"
Grand cover nil. Lyco obs

No more oak.
B replacing YB & RM
