Trail is between Beaver Meadow Lean-to & spring.

Miscellany: ~~Septentriale~~ reperi?

① Ranunc. bulbosus (?) in flower at 1st & 3rd beaver meadows. Large yellow 5 sepals (?), and trifoliate leaves, each leaflet 3-lobed but not plants ± 2' tall. But can a European wander this far into 1^o forest?

② Peter Evans, Hardenbergh Tam Forest Ranger, wrote "Hi Doc" in between MK sign-ins. Not met.
