Time

Witchhobble - 1st obs.
at ±2950 on trail after
the last continuous SUBst
before the 3000' bend.

From the spring up, plants
colonies are small & scattered.
They become larger & more
numerous on the higher
ridges, often around edges
of fern glades.

Common on W Schoolhouse
Summit and on the NW
shoulder above (B).
Abn at (E) and (D).

Logdeck fills in slowly
with YBs to 5" at (B),
plus B sprouts & some MO.
DP-RA were 1st to fill it
in. Other decks are similar
very slowly filling in with
trees after ±45y.

The logging was re-
stricted to a belt closely
following the roads, the
remainder on the ridge
crest untouched & still 10.

Abns on ridges

- (C) max. ± 12" to 18", BC dom.
- (F) 5" SUB (one?), 12" FIR
on ledge top. YB to 24"

Ages not measured via
ring counts on broken limbs
& trunks.

- (P) 22" SUB at NE end of
meadow in cave.

Sorbus distn.:

- (E) On highest point - see *
- (L)
- (T) to (S) on ledge.

Crown heights

- (B) 40' ± (K) Fir ± 30'
- (C) ± 30' to 35'. Actual
measurements on damaged
trees, but topmost branches
prob. fell earliest & rotted.
22' RM, 24' SORB. *

dead
BC?
broken
& down
29'

- (H) ± 30' (I) 25' ± estimate.
RM down measured 26', 22'

BC down
25'

- (P) 70' measured damaged SUB
at NE end of meadow.
Several others similar.
Some standing trees estima-
ted to be up to 80' in
a small cave.

Photos

FIR distn

Scattered **(T)(B)(S)** area.
None on **(C)** today, but
see 1970 transect #
On ledges **(CC)** - see \neq on
#254-28.

(D) Grove with abun.
repro at Schoolhouse Bog.

(F)(G)(H) 5 Firs observed
from **(CC)** on the NW shoulder
of East Schoolhouse, but none
on summit **(I)**.

(J) One ca 12' tall. **Raven
head**

(K) 30' tall. NO
repro. At least 9 trees, +
one 3" dead spar

(S) to **(T)** 2 older trees, a
few saplings browsed "yews".

Fern glades are ^{mostly} in
YB, BC or FLR forests,
not SUG & seldom B
because of the springing
& thickets.

Fir remain on sites
where ridge hardwoods
are typically < 30' high.
What about valley exceptions?

Invasion rates of glades

(C) Saplings + sprouts =

B = 6" to 8" / y, up to 13" / y

MO = 4" to 8" / y

BC = 8" to 12" / y, up to 15" / y
on sprouts

VA = 4" to 8" / y, difficult
to measure because of
lack of bud scale scars.

BC can sprout from the root
collet grow 15 to 16" / y.
RM, too.

(J) B invading a small
DP glade at 2" to 6" to 8" / y.

Glade size, continued

(K) Four glades of DP in
a cluster, 76' wide,
60' wide, and two smaller
on terrace.

(K) to **(L)** One huge glade 130' ±
across on a terrace, one low
ledge below terrace **(K)**.

HOT - nil shade left from
deciduous hardwoods.
Maybe 700F in shade!

DP has enough light to
follow the road (trail)
edges, but much less beyond
from **(A)** to ± 2950' level.

Size of glades

(254-27)

(C) 175' long along summit
crest on a NE-SW axis.
52' wide, and extending
down steep SE shoulder dis-
tance another 28'. ± 80' wide.

Some dead BC. BC dom't
RM & YB. Many broken
limbs on crowns and many
on ground. Both \$ spp
disturbed by shade.

In partial shade,
especially around glade
edges: \$C, OX, LL.

\$i in full shade. MO & VA
scattered in center of DP
glade. MO growing at
5 to 6" / y.

(D) Small DP glades, one NW
of Bog #391 & one to E of it
(DD).

(E) More small DP glades.
SM leaves only.

(H) 68' wide. BC dom,
with YB - B - RM

(I) Small opening on summit
10' across may be a deer
bed - \$c rhizomes dead
& exposed. \$c abundant.

(J) small

(K) see above

FLORAS

(O) Polemonium Seep, an open area perhaps 100' across, circular & draining into the beaver meadow at (P) over two 20' ledges.

- Aster umb. dom
- Polemonium
- Angelica
- Allium
- Thalic.
- S-lat.
- Viola sp.
- Lap

(P) Schoolhouse Meadow

from NE to SW
At edge: S lat under SUG

- Calamagrostis dom.
- Angelica
- EUP
- LAP
- CINN
- Oxoclea, Scirpus cyp
- Royal fern
- Glycyca can
- Sphagnum pockets,

with squarrosium at lower end:

- Ilex vert
- Nemo
- Coccintha
- Polytrichum (sp. described by Mark Eyles - not common.)

- Rhodo
- Scutellaria lat.
- Polemonium at NE end
- A card above

Seep 2542

Dimensions of Schoolhouse Meadow (P)

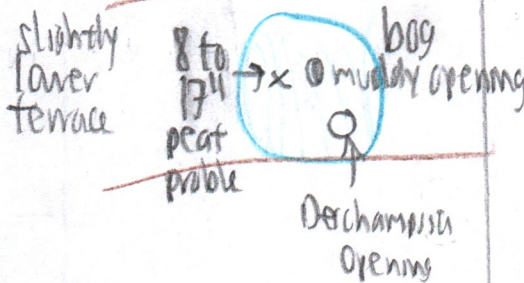

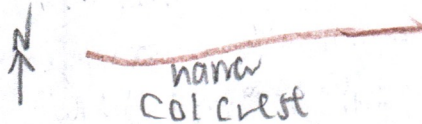

Estimate: 80 to 100' wide x 350' long (400' possibly). Maybe 1 acre?

South ridge between 6 to 10' high.
Peat 8 to 11" deep by probing.

Bog #391

Schoolhouse Bog (D)

- FIR grove
- NEMO
- VLASS abun. & stinking
- VA abun.
- RHODO
- CINN
- Sphagnum
- COPTIS
- CC

254-28

(CC) Ledges have MM, Ilex mont, SUGB, plus a few fir saplings scattered on ledge top like yews. Keenly browsed - Polypody.

(DD) Open ledge area on narrow crest E of Bog #391 (D). 10' boarder perched on ledge.

(F) Dense B thickets

Aster card - m fl. below register near (A).
