Using 5/1/06 elev. from 5/1/06  
**B C D E F G**, calculate intermediate point elev. from  
 2518 - 2060 / 29.52 - 29.08 = 458 / 0.500" = 0.916  
 3260' - 2060' = 1200' = 0.916 on 5/1/06  
 29.58" - 29.27" = 0.31" = 7.55"  
 2518 - 2060 / 29.52 - 29.08 = 458 / 0.500" = 0.916

3260' - 2810' = 450'  
 28.67 - 28.22 = 0.45"  
 450' / 0.45" = 1000'

- (A) (A) Parking area <sup>in</sup> old pastures.
- (B) (B) Corner of stone wall above steep OST. Seat. SUBS to 30" must have been an old Sugarbush.
- (C) (C) Stone wall on left runs E-W. Stumps < 5y. SUB, ASH, RA
- (D) (D) BASS
- (E) (E) ASH, B, BC, SUB dom. good soil cuts along road
- (F) (F) Beech live > 20" several, with dbh dark, rough bark
- (G) (G) More RM. 1st Ledge. Stony fill
