

Sid's Notch from Haynes Hollow

to sample Bog #392

223-21

7/21/07 with
Doug Egeland

Location	p	Δp	Δe <u>0.955</u>	e _{calc}	e _{map}	time	R
A) Haynes Hollow Rd.	29.48	0.00	—	—	2080	10:50 AM	
B) lower edge of SUB defoliation band B&S-ASH	29.15	0.33	315	2395'			
C) Non-defoliated beech "island"	29.04	0.44	420	2500'			
D) base of steep slope one ASH	28.96	0.52	497	2567'	e-p#531		
E) SUB to 30"±	28.92	0.56	535	2615'			
F) SUB 35" measured	28.87	0.61	583	2665'			
G) Top steep slope	28.82	0.66	630	2710'	e-p#532	12:05 PM	
H) "pancake" BC	28.78	0.70	669	2749'??			
I) Bog #392 Sid's Notch	28.81	0.67	640	2720'	2720	12:30	
	28.79	0.68	<u>0.941</u> ⁶⁴⁰	2720'	2720	3:30	
near G) begin descent	28.80	0.67	630	2710'	e-p#532		
D) base of steep slope	29.00	0.47	442	2522'	e-p#531	4:05	
J) temporarily less thick	29.06	0.31	292	2372'			
K) end of defoliation east end	29.10	0.37	348	2428'		4:15	
L) KBM understory, upper limit	29.26	0.21	198	2278'		4:30	
A) Haynes Hollow Rd.	29.47	0.00	—	—	2080	4:40 PM	

$$\frac{2720' - 2080'}{29.47' - 28.81} = \frac{640'}{0.67'} = 0.955$$

$$\frac{2720' - 2080'}{29.47' - 28.79} = \frac{640'}{0.68'} = 0.941$$

Description: Haynes Hollow to Sid's Notch

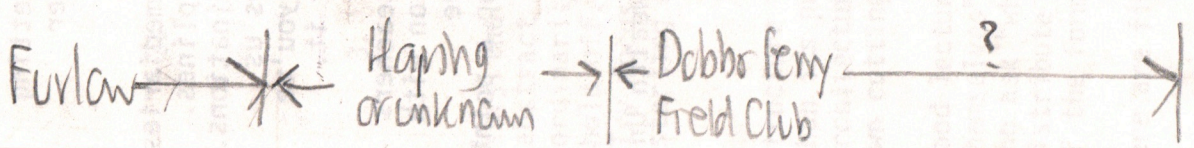

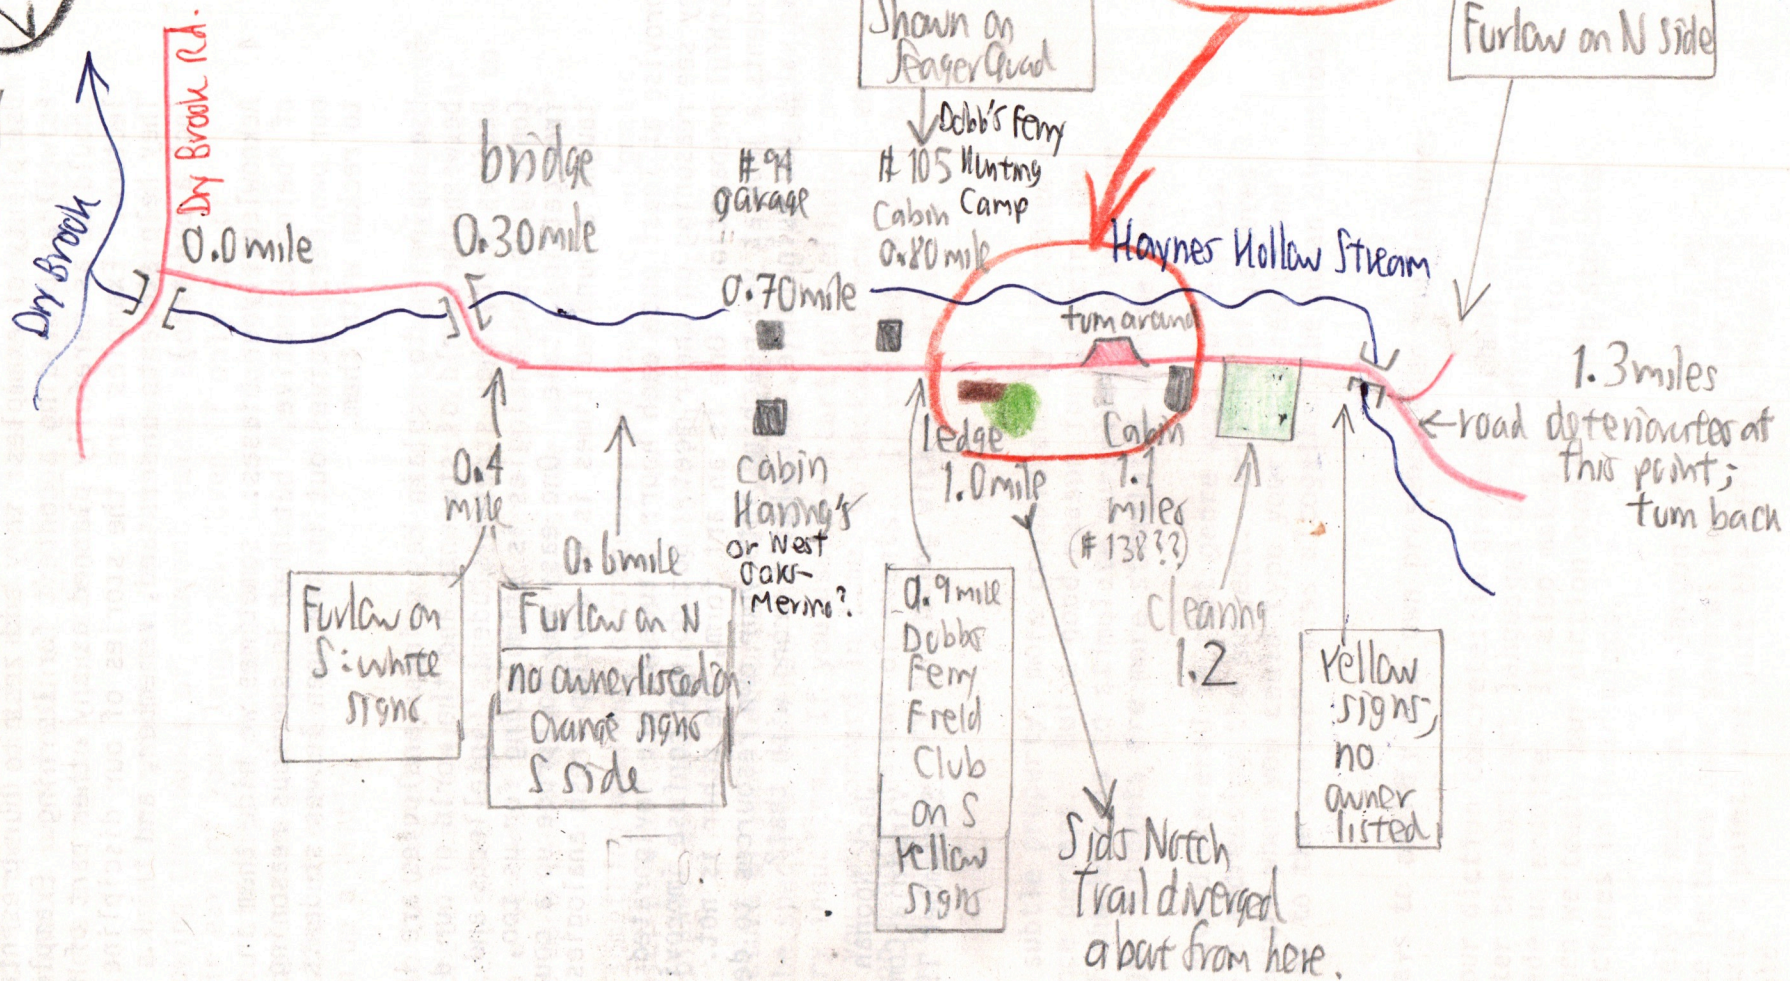

223-23

- (A) 2080'. Haynes Hollow rd. Old log road + stonewall just above ledge.
SNY corner on hemlock on steep slope. Steep slope, see my, with
ASN, BASS, NEM
- (B) 2395' + (K) 2428' to (D) 2522' to 2567'
gentler slope with forest Tent Caterpillar defoliation, maybe $\frac{2}{3}$ to $\frac{3}{4}$
defoliated. Remarkable growth of SOMB up to 6' tall in this
2007 season, forming thickets with RA + some MO.
Scattered ASN
- (D) to (G) = 2522' to 2567' up to 2710' Steep slope with ledge + boulders
at top. NO ASN. Subs to 35". 1° on this slope only e-p III 531d
Whether this is a distinct 1° area or whether it ties onto the 532
main Eagle Mtn 1° tract is unknown. \$CAMPILOPTEA.
- (G) to (I) 2700 to 2720'. On crest of spur. One dead 30" beech between
(G) + (H). BC dominance on shallow soils with YB, B, DP,
TB, OX, MO, LL. Boreal grand cover.
- (I) Forest around Bog #392 3 OAKS, $\frac{1}{2}$ defoliated and maybe ca-100 y old.
ASN, BASS, OST, BC, RM, SUB, YB. Late 19th or early 20th century
selective logging prob. Came up from Seager + through Sid's
Notch. Dead ± 15" ASN at SW edge of Bog.
24" BC NW of bog. Canopy 60' to 70' high, not stunted.
When was SNY acquisition?
