Huggins Lake

(No barometer carried)

442-15

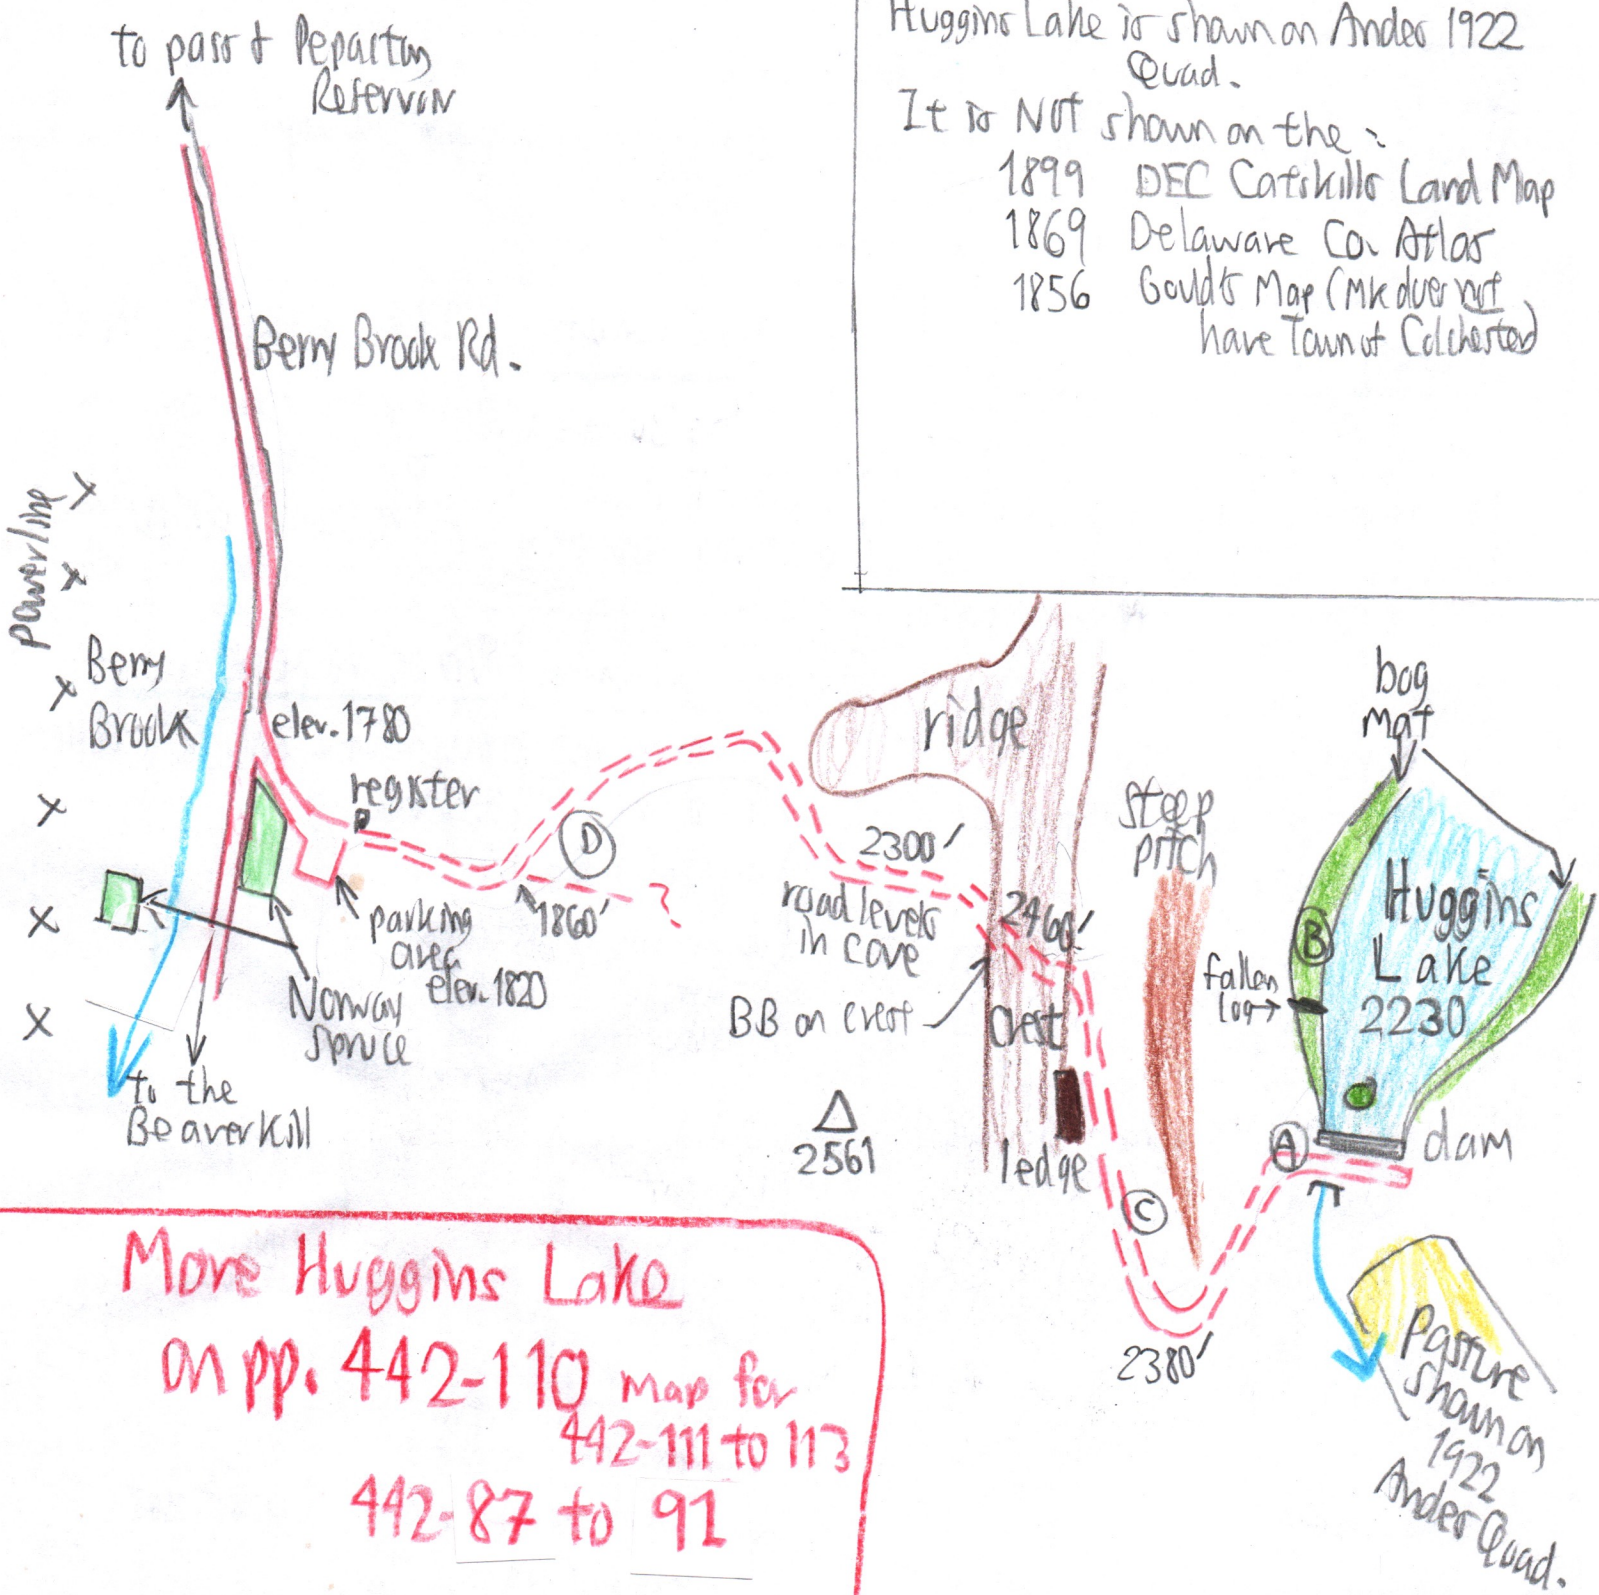

Phys. Ed.

with Brian Smith, friend of Lisa Lyons, teaching in Roscoe

How old is the bog mat? The dam?
Huggins Lake is shown on Andes 1922 Quad.

It is NOT shown on the:

- 1899 DEC Catskills Land Map
- 1869 Delaware Co. Atlas
- 1856 Gould's Map (Mk does not have Town of Colechester)

More Huggins Lake

on pp. 442-110 map for 442-111 to 113

heavy oak-sub-son defoliation ^{only} locally

Forest along road

Seems to have been logged x:
1st time created ASH + BC + BASG,
OAK, maybe 75 or 80y old
(estimate). None abundant
One OST.

2nd time with 40y stumps
released BB; one sta.
at 2460' crest + more
below.

SUGs locally defoliated in
varying degrees the
most on the ridge to
NE of + visible from the
dam.

Scrophularia at (D). OX

Pilea at (C)

Bag mat

20 to 30' wide.

Small island
forming near dam
with Spiraea lat.

(B) Large patch of Vacc-macrocarron

Sphagnum not abundant - only in pockets.

Vib dent, defoliated

Spiraea lat + tom.

Polygonum sagittatum

Potentilla simplex

Zizia

Lysimachia terr.

Solid rugosa

Cx inferior

Cx utriculata

Cx lucida

Cx ovalis

Cx canescens

Scirpus atrovirens

Scirpus cyperinus

Juncus pelocarpus ? + effusus

Sisyrinchium

Glycena nervata + Calamagrostis ?

Typha ang ?? (No fls or fruits),

lvs. max 1/2" wide.

Beaver dam ^{u/c} on top of
concrete dam has raised
the water level onto
the road at (A)

Dulichium in ^{open} water
at mat edge
