

163-34

file in ~~BOG #312~~ folder, Slide Mtn. 163-34

Perched water table over bedrock with till heavily absent. Abun. VCA's + COPTIS (gone by 8/24/17 ??)

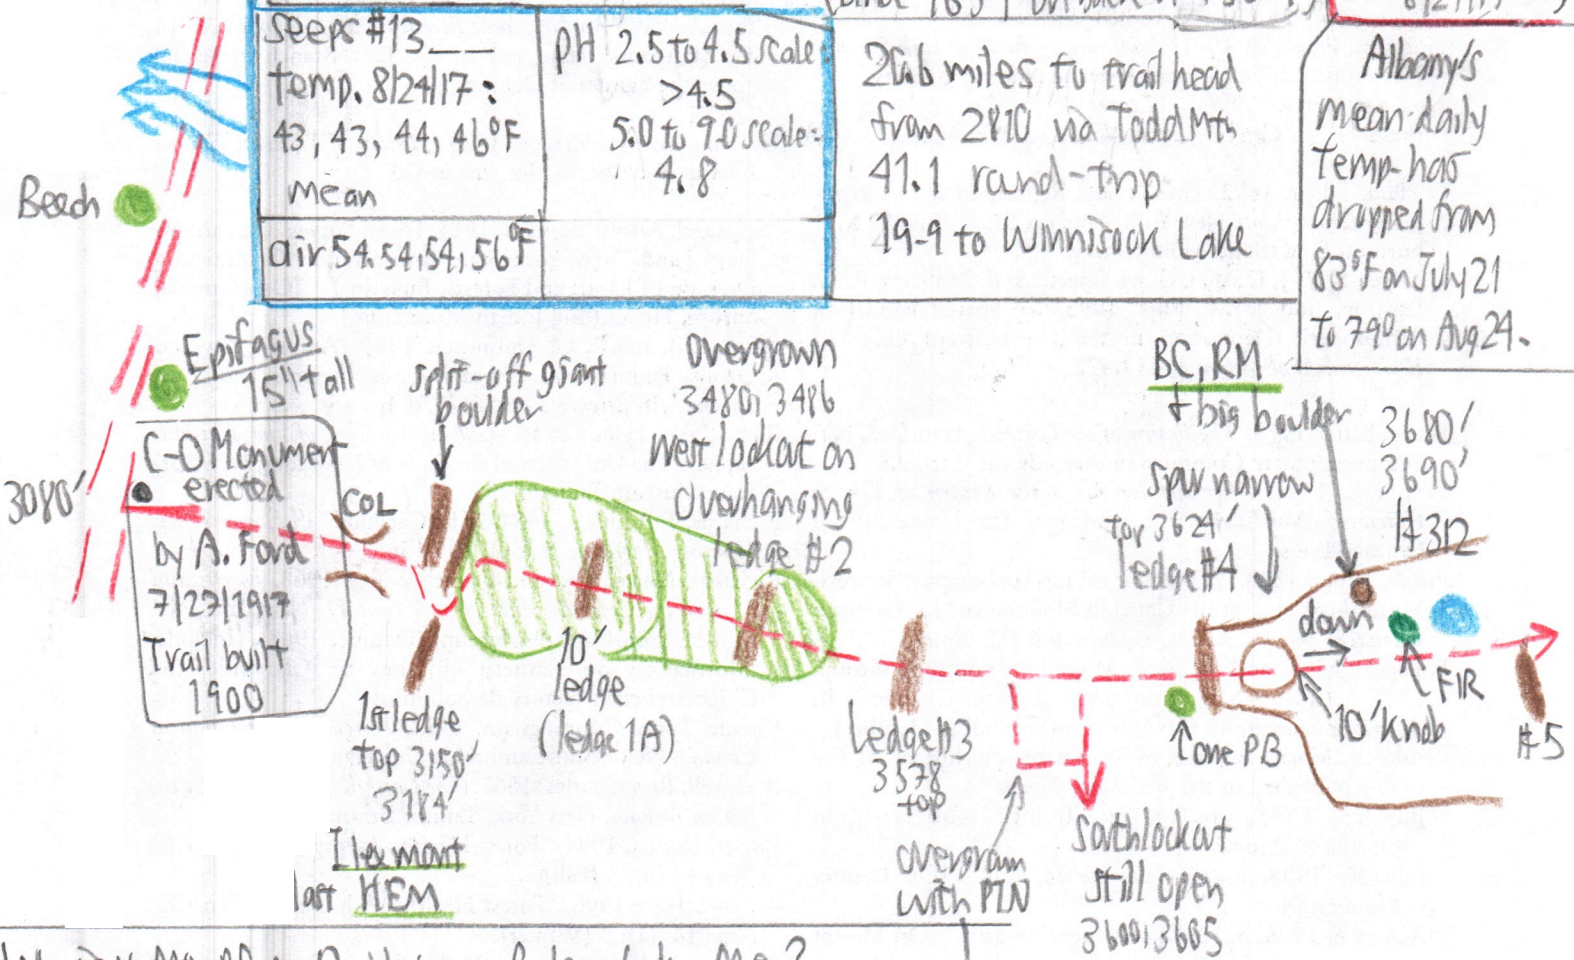

4.3 to 4.5 on 7/22/75 from field notes on back of p-163-3. pH of Sphagnum area at Table Mtn. Lookout along Curtis-Dymabee Trail, elev 3600', not at BOG #312, but below it.

Curtis-Dymabee Trail on 8/24/17 en route to Bog #312 to take basal peat measurements. (See also pp. 163-26 to 29 and 163-1 on back of 150-4)

Seeps #13 Temp. 8/24/17: 43, 43, 44, 46°F mean air 54, 54, 54, 56°F	pH 2.5 to 4.5 scale > 4.5 5.0 to 7.0 scale: 4.8
---	--

2.6 miles to trail head from 2810 via Todd Mtn. 41.1 round-trip 19-9 to Winnissock Lake

Albany's mean daily temp has dropped from 83°F on July 21 to 79°F on Aug 21.

Why isn't Mtn-PB on Doubletop or Balsam Lake Mtn?

Mtn-PB distn. follows dense fir stands with frequent disturbance, not ridgehdws.

Axe-cut fir 12-45 11" diam at 10' up fell across trail. 1st 38y mod-growth 60 more y very slow

Axe-cut beech 90y and 15" diam from > 20 ft-up fell on trail.
