25.5 miles — 2810

Vegetation

Urbanum
Geum macrophyllum in full flower
along trail just past Garrett barn + farther
up part end of red pine.

Ribes triste at Ward farmhouse.

Kelly Barn has YB atop high
upper wall and a large 2-trunk
ASH in the middle.

Just above the barn, under the
Norway spruce, are LL (!!), AN,
MC, TB.

The area around the 3 Kelly Foundations is covered with thousands of dead, foot-high spruce seedlings. Yet, higher up on the hill to the south, there is some live spruce repro, and plenty of dead older spruce on the ground making walking difficult.

Uvularia patch on old road betw. till cuts

Big TE in Farmhouse cellar hole

Near stone wall cusp, B + YB
saplings are dense under the
spruce
