A new online symposium of silvicultural prescriptions and associated outcomes of actual on-the-ground management activities.

Grace Smith, Tony D’Amato, Jill Levine
University of Vermont, Rubenstein School of Environment and Natural Resources, Burlington, VT

Background

The Northeast Silviculture Library (NESL) was conceived with the idea that every silviculture treatment is an experiment and every forest manager is both a teacher and a learner. It is a place for foresters and other resource managers to exchange real, on-the-ground examples and outcomes of their management activities, with the overall goal of increasing knowledge of how to best steward the changing landscape of the Northeast to promote sustainability and adaptability.

Why contribute to NESL?

- Engage in a community of practice with other foresters and resource managers
- Contribute to knowledge base used to address current and emerging management challenges
- Exchange silviculture prescriptions real-time in rapidly changing environments
